Picture Plus now available with a black frame!

Noiseflex[®] Picture Plus are sound absorbers with an acoustic filling which can be individually printed with your own pictures, motifs, logos etc. The printed fabric is clamped into the frame by means of a piping profile which can be exchanged at any time.

Our sound-absorbing murals are now also available with a **black frame**, which is a black anodised aluminium frame. Visually, this is a completely new highlight, which shows our acoustic products in a more contemporary and noble design.

Modern design – whether at home or in the office

Provides new and improved colour effects.

Our aluminium frame is of course still available.

The following BOSIG acoustic products are now also available with a black frame:

- **Noiseflex[®] Picture Plus** (frame width **40 mm**) in the standard dimensions:
1000 x 500 / 1000 x 1000 / 1500 x 1000 / 2000 x 1000 mm or other special dimensions on request.
- **Noiseflex[®] Partition Wall S** (frame width **45 mm**) in the known standard dimensions.
